

I am writing in response to the new LPFM broadcast service. It will effect many local residents that listen to KLOVE. KLOVE supports our local community by announcing our local events that directly effect myself and many others. If KLOVE is displaced by an LPFM broadcaster I will not be able to hear the kind of music that is suitable for myself to listen to with small children in the car as well as hear the community announcements that effect my family. KLOVE provides family appropriate music and news that are not obscene or use language that I do not want my children to hear. The service that KLOVE provides is very difficult to find elsewhere and fills a need within the community. Please consider the effect that this will have on our community and our daily family lives. It is such a positive influence in a world of violence, and corruption. I would hate to lose it.
